- 5 Through the display screen, we can acquire the total mileage of scooters driving, battery power consumption, driving speed. Note: the power consumption of the display screen can only represent the approximate power range. It is only for reference, and it can not accurately measure the power.

5. Announcements

(1) Safe driving

In the acceleration or deceleration time, be aware to avoid the body's gravity in the hand, to avoid the body forward. The standing posture should be keeping your feet one after the other, thus lead to more secure and stable riding.

A. When turning, the body is parallel to the handle. Please pay attention to the road condition before turning. Be sure it is safe and then turn.

B. When the brakes, the gravity center of body backwards. It is better to learn to control the center of gravity when braking. Otherwise it will cause two situations: the car tilted forward, as well as brake and steering system damage.

(2) Charging

1. When charging, please put safe place where children can not touch.
2. The red light indicates charging and the green light indicates charging is complete.
3. If you do not use it for a long time, charge it every 2 months.
4. Do not charge in a damp place.
5. Do not run the motor while charging.
6. Avoid contact with the material leak out of the battery accidentally.
